# Unicalce | Italy
Construction

The history of the UNICALCE group has its origins in Lecco where the first lime production kiln was installed in 1923. Today the company comprises 22 modern kilns located throughout Italy, 14 plants and 500 employees. It is the leading producer of lime and derived products in Italy, manufacturing and developing products needed for most of the national productive infrastructures: environmental, energy, manufacturing and construction.

We chose uniFLOW Online to simplify the print management without burdening the IT departments with additional demands.

Franco Fuzio - IT Group Manager

Customer challenges and requirements

UNICALCE believes that the achievement of high quality is only possible by coordinating actions across the entire company, with particular attention to those people working to reach a common goal. To ensure the quality of all products a precise global program has been developed, from making use of cutting-edge technological systems, control of raw materials and finished products, precise procedures for production cycles, right up to computerized management of orders and accurate deliveries. To achieve this goal, Unicalce required a centralized system to control the printing infrastructure, reduce costs and increase security.

The solution

The simplicity of Canon devices and the implementation of uniFLOW Online for the management of print and scan are the key elements which have contributed to the success of this project. Unicalce utilizes Canon imageRUNNER ADVANCE C5535 and C3520i connected to uniFLOW Online. Guests can print their documents in a controlled and secure way without effecting the activities of the company's IT department. In addition, with the My Print Anywhere function, users can securely release their print jobs from any connected device.

Connected devices

- 3 x imageRUNNER ADVANCE C5535
- 2 x imageRUNNER ADVANCE C3520i

Software solution

- uniFLOW Online with 64 User Subcriptions (Basic Printing)
- Secure Printing
- Mobile Printing (Internal and Guest printing)

Benefits

Being a serverless, cloud-based solution, uniFLOW Online allows Unicalce to control related costs without taking on the burden of a dedicated infrastructure. Printing costs are now better controlled through personalized reports which can be extracted at any time from the system in a format that can be re-processed for administrative purposes. Users can easily print their documents using a single queue, allowing the release of print jobs from any connected device. PIN, Card or Mobile Phone can be used to allow device authentication to authorized users only.

Guests can easily print jobs by securely authenticating on any device upon receipt, via email, of a unique job code generated by uniFLOW Online.
