

## Atinord | France

### Legal protection for adults

Atinord was set up on 3 January 1971, with association status under French Law 1901 rule, to provide legal representation for the protection of adults. Comprising 220 employees over 10 branches, this ESSMS - Social and Medical-Social Establishment and Service - manages 7,000+ protection measures determined by supervisory judges for people with mental disabilities. Support is provided via legal guardianship measures to ensure protection of individuals with intellectual disabilities and the safeguarding of their property. Communication to and from the justice department is still mainly conducted via printed paper.

*Printing is no longer a bone of contention. We have achieved the reliability and security objectives that we set for ourselves.*

Céline Gobert, Quality and Information Systems Manager

## Customer challenges and requirements

■ ■ When Ms. Gobert assumed responsibility for the Information System 2 years ago, it quickly became clear that print management via MFDs was unreliable. Document print out was not guaranteed and would randomly occur during the day. The architecture and print server were outdated so a decision had to be made to evolve towards a more modern infrastructure. At the same time, the increased use of SaaS tools and M365 (Exchange, SharePoint, etc.) reinforced the need to migrate to a Cloud solution.

## The solution

■ ■ To meet these challenges, FACTORIA a CANON France offered CANON IR-Advance equipment associated with uniFLOW Online for reliable and serverless management of the entire fleet. Implementation of secure printing, with a single queue, guarantees secure and systematic document output regardless of the chosen site. Scanning functionalities are also much appreciated by users, either to scan to their own email box or to OneDrive. Statistical reports will help measure savings made by optimizing printing activity.

### Connected devices

- 13 iR-ADV 529
- 1 iR-ADV 5840

### Software solution

- uniFLOW Online 14 Type 1  
Cloud Print&Scan  
subscriptions

## Benefits

■ ■ Users now have confidence in the office systems. New employees are automatically integrated into uniFLOW Online without requiring manual intervention. Once issued with a PIN code, they can immediately copy, print securely and scan. For those on the move, the single print queue prevents destination errors and associated security/confidentiality risks. The efficient associated services provided by FACTORIA allows Atinord to free up its time with complete peace of mind.
