uniFLOW Online 2022.1.1

1 uniFLOW Online 2022.1.1 - Release Notes

Type	Internal reference	Description
Improvement	MOMO-27440	Improved the functionality to upload device volumes more often.
Improvement	MOMO-23441	Extended SharePoint Online scan and fax profiles to allow specifying the root folder by directly entering a SharePoint URL.
Fixed (QA)	MOMO-27449	Changed message on yellow banner when jobs are processed in the background.
Fixed (QA)	MOMO-26873	Fixed loading spinner on cost selection list in ULM.
Fixed (QA)	MOMO-26868	Improved user feedback in Scan Center when external systems are throttling.
Fixed (QA)	MOMO-26797	Add support for Seiton Fax configured with "Divide into pages" as "FF".
Fixed issue	MOMO-28126	Fixed a bug where reserving budget for a copy job may have failed on iR-ADV Gen2 devices.
Fixed issue	MOMO-27845	Fixed a problem where Microsoft Universal Print jobs may intermittently fail.
Fixed issue	MOMO-27832	Fixed a bug where job prices were no longer shown with old print UI on MEAP devices.
Fixed issue	MOMO-27796	Solved an issue where a user uniFLOW SmartClient owning the job spool file would not be considered for job release via the real-time connection platform if it was assigned to a different location tree than the device.
Fixed issue	MOMO-27653	Fix problem with printing a secure job via uniFLOW SmartClient in simplex mode (overriding the original duplex specification).
Fixed issue	MOMO-27436	Avoid upload of device counters and device status when a device is not entitled for fleet management.
Fixed issue	MOMO-27321	Resolved problem where a job's stapling option could be changed when opening options dialog on a MEAP device.
Fixed issue	MOMO-26906	Fixed problem with garbled job name characters in reports.
Fixed issue	MOMO-26899	Fix landing in the page of the last selection after an edit action.
Fixed issue	MOMO-26701	Fix truncation when having a long arabic text

Type	Internal reference	Description
Fixed issue	MOMO-26322	Resolved one problem that could cause barcodes/QR codes with non-ASCII characters to be transmitted incorrectly.
Fixed issue	MOMO-26303	Allow uniFLOW SmartClient in emergency mode to directly print to AddOn Platform MFP devices.
Fixed issue	MOMO-26300	Administrator notification emails are not sent anymore when enabling or disabling a user via PowerShell.
