

Release Notes

uniFLOW Online 2022.3

1 uniFLOW Online 2022.3 - Release Notes

| Type | Internal reference | Description |
|-------------|--------------------|--|
| New Feature | MOMO-29298 | New device UI was enabled for add-on devices. |
| New Feature | MOMO-12252 | It is now possible to cancel a subscription in trial mode at the end of the month. |
| Improvement | MOMO-28016 | The incoming email provider is suspended after five consecutive failed attempts to retrieve emails. The administrator is informed about this by email and can restart the service by saving it again. |
| Improvement | MOMO-27458 | Added user re-authorization workflow to Automatic User Export. |
| Improvement | MOMO-27452 | The first row of Therefore Online reference fields are no longer pre-selected. Users now need to select the desired row manually. |
| Improvement | MOMO-27329 | InkJet device print accounting will respect default price profile and cost centers. |
| Improvement | MOMO-26872 | List pagination indicators for the print jobs lists and the cloud browser were replaced by a textual information about the current page and the total page count. |
| Improvement | MOMO-26869 | Refresh icon replaces drag-down operation. |
| Improvement | MOMO-26847 | Added PowerShell command for uploading a PDF print job to a specific user's print queue. |
| Improvement | MOMO-26753 | A new option for Single Selection fields allows the user to select the None option in case the user does not want to make a selection. In the special case of SharePoint Online retention labels, it is now possible not to assign a label to the document. |
| Improvement | MOMO-26274 | Extended device status to cover low-power mode scenario. |
| Improvement | MOMO-25857 | Buttons are now interactive and have a visual indication when they are pressed. |
| Improvement | MOMO-24181 | Introduced <i>Cost Center Manager</i> user role. |
| Improvement | MOMO-23666 | The support of uniFLOW Online accounting settings for the currency symbol and the number of decimal places was added to the price column of the print jobs lists. |
| Improvement | MOMO-23535 | If no Local Server Agent is available, scan profiles that would use them are not displayed on the device UI. |

| Type | Internal reference | Description |
|------------------|--------------------|---|
| Improvement | MOMO-22424 | Enabled direct printing when the SmartClient is running in emergency mode and Storage location of secure print job information as well as Storage location of secure print job file are both set to uniFLOW Online . |
| Improvement | MOMO-22368 | Added option to configure proxy user name and password authentication for the System account used in the Local Server Agent. |
| Improvement | MOMO-22347 | Introduced <i>User Administrator</i> role. |
| Improvement | MOMO-17512 | Added the ability to disable/enable users via the UI. |
| Improvement | MOMO-16463 | Added paper size setting to the <uniFLOW> SmartClient printing defaults. |
| Improvement | MOMO-16367 | Fix accounting of scan jobs to differentiate color and b/w. |
| Improvement | MOMO-16124 | Added support for eco-stapling to LIPS LX workflow. |
| Improvement | MOMO-14953 | Deletion of user identities that are obsolete but are needed to complete scan jobs is now prevented. |
| Improvement | MOMO-13365 | Changed the behavior of the Remote UI login password request. |
| Epic | MOMO-27663 | Added OAuth 2.0 as an authentication method for the outgoing email provider. |
| Epic | MOMO-26918 | Improved the user experience when using MS Universal Print. |
| Epic | MOMO-24648 | Added an auto-release function for New Device UI-enabled devices with the new device UI running on the momclient. |
| Epic | MOMO-21117 | Added option to supported scan profiles to allow specific data to be extracted from the barcode using RegEx and store the value into a meta field in the target system. |
| Epic | MOMO-18192 | Added support for Managed Metadata columns that can be added to SharePoint lists or libraries, allowing the site users to select terms from a specific term set. |
| Fixed issue (QA) | MOMO-30145 | Resolved a potential problem where unfinished scan jobs were not properly canceled on logout from device. |
| Fixed issue (QA) | MOMO-29273 | Resolved a potential problem in the SharePoint connector where no files were listed in folders containing a vast number of files. |
| Fixed issue (QA) | MOMO-29137 | When receiving files to print from an external service, a delayed retry is now attempted if the external service states that too many requests have occurred. |
| Fixed issue (QA) | MOMO-22638 | Provided emergency login for users with PIN code when using the image login widget on the dashboard. |

| Type | Internal reference | Description |
|------------------|--------------------|--|
| Fixed issue (QA) | MOMO-16354 | Fixed a problem where a uniFLOW SmartClient with enabled Silent user registration incorrectly removed a first print job after successful user registration and incorrectly displayed an informational pop-up window. |
| Fixed issue (QA) | MOMO-12261 | Fixed a problem preventing the use of the biggest paper size on smaller devices when using scan profiles of the <i>Scan business cards/ receipts to...</i> variety. |
| Fixed issue | MOMO-30693 | The uniFLOW SmartClient now initiates its connection to uniFLOW Online even if the network interface changes during initial uniFLOW SmartClient startup. |
| Fixed issue | MOMO-30254 | uniFLOW SmartClients running in changing network environments now don't cause traffic overhead anymore, even if the network has different proxy requirements that could previously cause massive network noise due to concurrent connections to uniFLOW Online being re-established. |
| Fixed issue | MOMO-30104 | Fixed a bug in the uniFLOW SmartClient for Mac that could cause the application to crash if no internet connection was present. |
| Fixed issue | MOMO-29929 | Fixed a bug due to which uniFLOW SmartClient pop-ups were not placed in the foreground as expected. |
| Fixed issue | MOMO-29887 | Emails sent to the Mobile Print address with the email address in capital letters can now be printed. |
| Fixed issue | MOMO-29751 | Fixed a bug in the uniFLOW SmartClient for Mac that could cause finishing options, copy count, and duplex printing settings to be ignored. |
| Fixed issue | MOMO-28918 | Fixed problem in Scanning that could lead to the folder selection for SharePoint Online being displayed even though turned off. |
| Fixed issue | MOMO-28816 | Basic explanation on using the Chrome Extension now also displayed to users next to the Chrome Store link. |
| Fixed issue | MOMO-28601 | Added individual proxy authorization configuration to the uniFLOW SmartClient to be able to submit proxy credentials for IoT connections. |
| Fixed issue | MOMO-28593 | Incoming email providers based on the GMail/O365 template are not reset to <i>Manual configuration</i> anymore after sending an error email to the administrator. |
| Fixed issue | MOMO-28527 | In uniFLOW Hybrid mode, uniFLOW Release Stations configured for a hybrid RPS now display a Subscriptions tab after they are synchronized to uniFLOW Online. |
| Fixed issue | MOMO-28488 | The uniFLOW SmartClient for Mac no longer crashes when printing while offline. A message will be displayed to the user. |

| Type | Internal reference | Description |
|-------------|--------------------|--|
| Fixed issue | MOMO-28379 | The uniFLOW SmartClient for Mac now allows a larger selection of special characters to be used in the job name. |
| Fixed issue | MOMO-28180 | The uniFLOW SmartClient for Mac now retrieves the help URL from the cloud. |
| Fixed issue | MOMO-28130 | Corrected help URL in uniFLOW SmartClient for Windows. |
| Fixed issue | MOMO-28096 | Added basic validation to externally obtained OpenID data. |
| Fixed issue | MOMO-28025 | The <i>DIF_MediaType</i> setting is now handled correctly, and requested hole punching settings are now considered when printing and releasing A3 documents in the scenario where <i>Storage location of secure print job file</i> is set to <i>uniFLOW Online</i> . |
| Fixed issue | MOMO-27844 | Added an additional page in case duplex is detected and an odd amount of pages has been processed. |
| Fixed issue | MOMO-27471 | Improved the scalability of the uniFLOW SmartClient auto-update and bulk-logging upload token handling. |
| Fixed issue | MOMO-26906 | Fixed a problem with garbled jobname characters in reports. |
| Fixed issue | MOMO-26783 | Added code to avoid reboot when start option <i>Manually, then upon login</i> is selected for the uniFLOW SmartClient. |
| Fixed issue | MOMO-1706 | Fixed a problem in the uniFLOW SmartClient .msi package generator so that redundant files, folders, and registry items are now removed during SmartClient uninstallation. |
