

Release Notes

uniFLOW Online 2023.1

1 uniFLOW Online 2023.1 - Release Notes

Type	Internal reference	Description
MOMO-16057	New feature set	Users can now release print jobs stored in uniFLOW Online to a MEAP device without the need for a connected uniFLOW SmartClient in either of the following ways: <ul style="list-style-type: none"> via the mobile app, without the need for a SmartClient, and by selecting a printer in the Universal Output Queue, even if there is no direct connection from the uniFLOW SmartClient for Windows or the uniFLOW SmartClient for Mac, respectively, to the MEAP-enabled device.
MOMO-21247	New feature set	Improved the device and email error messages to better guide users if issues occur during the scan procedure.
MOMO-25906	New feature set	Users can now top up their budget via PayPal.
MOMO-29434	New feature	Users can now view and set the file name when sending a scan job to a cloud destination.
MOMO-29942	New feature	Users can now view and set the folder path when sending a scan job to a cloud destination.
MOMO-30438	New feature	Users can now search cloud folders manually.
MOMO-30491	New feature	Users can now see and edit file names in cloud scan workflows.
MOMO-30781	New feature	Users can now review the list of email recipients for email workflows before sending.
MOMO-26730	New Feature	The Device list widget now contains a Last communication column displaying information on when the device last communicated with uniFLOW Online.
MOMO-14335	Improvement	Users eligible to use Windows PowerShell for managing uniFLOW Online objects can now retrieve the subscriptions available on the tenant by applying the new Get-MomoSubscriptions Cmdlet. For details, see the White Paper available under https://ntware.atlassian.net/wiki/spaces/KB/pages/10780902105/Managing+uniFLOW+Online+objects+in+Windows+PowerShell .
MOMO-14411	Improvement	For Filing Assist and batch scanning, the appended batch number in the file name is optional (turned on by default).

Type	Internal reference	Description
MOMO-19219	Improvement	The tenant's Usage overview now shows usage data for the last month.
MOMO-19246	Improvement	Improved the error message displayed by the uniFLOW SmartClient in case problems occur during print job information upload.
MOMO-24182	Improvement	The notification email address is now checked before allowing a user to use a 'Scan to myself' scan profile, and users are alerted if the address is missing or erroneous.
MOMO-27715	Improvement	The device FQDN (if given) can now be used instead of the IP address to synchronize devices synchronized from uniFLOW Online to uniFLOW Server.
MOMO-27739	Improvement	When uploading print jobs from a uniFLOW SmartClient to a uniFLOW Server, all job and job ticket values are now submitted along with the print jobs.
MOMO-28456	Improvement	Added Silent User Registration (Enterprise Registration) to the uniFLOW SmartClient for Mac.
MOMO-29647	Improvement	Job-processing state icons are now displayed correctly in the detailed print job-processing status view.
MOMO-29742	Improvement	The Local Server Agent component was renamed to <i>Local Server Agent for uniFLOW Online</i> to make its origin and purpose more obvious.
MOMO-30007	Improvement	Set the User-Agent HTTP header entry to "uFSmartClient," catering to cases when the uniFLOW SmartClient displays web browser dialogs.
MOMO-30680	Improvement	Improved the user-facing error messages in the uniFLOW SmartClient for Mac.
MOMO-30682	Improvement	Added meaningful error message when printing through Drag and Drop when the document is over 100MB.
MOMO-31077	Improvement	<p>The new Allow job upload to uniFLOW Online option on the Print job handling configuration page of the uniFLOW SmartClient extension improves the usability in case the uniFLOW SmartClient for Windows's IoT hub connection to uniFLOW Online is currently interrupted.</p> <p>Note: The option is on by default, meaning after updating the uniFLOW SmartClient for Windows to the 2023.1 version, users can upload print jobs to uniFLOW Online in Local/Cloud configuration in case the Realtime Communication Platform is not accessible.</p>
MOMO-1365	Security	Resolved minor potential security vulnerability related to CAPTCHA generation.
MOMO-29165	Fixed issue	Resolved an issue that could cause print jobs to be deleted while processing a <i>Print & Keep</i> request from a uniFLOW Release Station in case spool storage and job information service were provided by uniFLOW Online.

Type	Internal reference	Description
MOMO-31281	Fixed issue	For dashboard widgets, the vertical scroll bars are now placed correctly.
MOMO-31944	Fixed issue	Reaching the allowed maximum number of failed PIN code login attempts now calls the correct error state.
MOMO-32546	Fixed issue	Resolved an issue that could occur when browsing a HOME-BOX2 scan profile's folders.
MOMO-32699	Fixed issue	Scan job file names in the scan job history list are now rendered correctly, thus preventing cross-site scripting attacks.
MOMO-33046	Fixed issue	Resolved an erroneous behavior that could be triggered by tapping the Start scan button rapidly multiple times in a row while processing a single scan page.
MOMO-33051	Fixed issue	Resolved a time-out issue that could occur when releasing large documents through Universal Output Queue in Zero Trust environments.
MOMO-14811	Fixed issue	The header of the <i>Department</i> column in the header row of exported CSV reports now contains the correct content.
MOMO-28833	Fixed issue	Resolved an issue causing print jobs to be erroneously removed by the uniFLOW SmartClient in case a <i>Print & Keep</i> request from a Release Station was processed.
MOMO-31197	Fixed issue	Searching in Google Drive now returns results according to the specified criteria.
MOMO-32019	Fixed issue	Resolved an issue causing the uniFLOW SmartClient to not check if its management servers are available again after a network disconnect.
MOMO-32054	Fixed issue	Resolved an issue that could occur when uploading the same accounting data multiple times within a short period.
MOMO-32654	Fixed issue	Print job accounting and refunding now work as intended, even if the CPCA readout occurs after the device budget session expires.
MOMO-32680	Fixed issue	For Print from Cloud print job names, special characters contained in the print job name are not removed during conversion anymore.
MOMO-32694	Fixed issue	For print job names derived from the subject lines of the emails to be printed, special characters contained in the subject line are not removed anymore.
MOMO-32931	Fixed issue	The uniFLOW SmartClient for Mac now consistently sends updated IP address information to the server upon an IP address change, e.g., after switching from one WiFi access point to another.
MOMO-33098	Fixed issue	Cost center selection is now skipped in case the user is assigned to only a single cost center.
MOMO-33641	Fixed issue	Instructions on connecting cloud storage providers are now displayed during the print process.
