Werfen | Spain Healthcare

Founded in 1966 in Barcelona, Spain, Werfen is a world leader in specialized diagnostics in hemostasis, Acute Care Diagnostics, transfusion, autoimmunity, and transplants. Through its Original Equipment Manufacturing (OEM) business line, more than 7,000 employees research, develop, and manufacture customized assays and biomaterials.

The company operates in 30 countries and distributes products in more than 100 territories. Its Headquarters and Technology Centers are in the US and Europe. Worldwide sales exceed €1.84 billion in 2022.

“Having managed our printing with uniFLOW server for over a decade, we have been able to move our print management to the cloud with confidence with uniFLOW Online.”

Toni Ala, IT Systems Director

Customer challenges and requirements

■ Werfen's global expansion required it to manage its printing environments centrally. The company's shift towards cloud technology, in response to the ever-changing and dynamic business landscape, necessitated a solution that adhered to this mindset. The solution had to be able to seamlessly integrate into multiple cloud environments, guarantee the highest level of document security and enhance the user experience and productivity for mobile users.

The solution

■ Canon proposed uniFLOW Online including its My Print Anywhere functionality and integration with Werfen's Azure Active Directory. The solution covered 60 MFDs located in different locations across Spain as well as sites in Italy and Portugal; a total of 93 devices so far.

Werfen had already worked with Canon, implementing its uniFLOW on-premise solution. uniFLOW Online's flexibility made integration easy.

Connected devices

- iR ADV C5840i
- iR ADV C5740i
- iR ADV C5540i
- iR ADV C3730i
- iR ADV C357i

Software solution

- uniFLOW Online: Cloud Print & Scan subscription
- Secure Printing (My Print Anywhere at anytime)

Benefits

■ Werfen had already streamlined their devices and enhanced printing processes for improved efficiency. Their goals of technological advancement, freeing themselves from on-premise infrastructure constraints, and accommodating multiple locations were successfully realized through the implementation of uniFLOW Online. This solution now ensures that all users can access consistent printing and scanning services, regardless of their location.

By adopting a unified Canon technology platform comprising imageRUNNER ADVANCE devices and the uniFLOW Online output management system, there has also been a noticeable improvement in the overall user experience.
